

ABOUT ME

I am an enthusiast with a relentless curiosity to learn, discover and innovate. My biggest commitment lies in creating, educating and empowering. I believe empowerment is the true key to unlocking potential.

I love to create. Simply building or designing something from concept to release gives me a thrill I just cannot explain. Being a creative means being able to express myself and leaving a small part of me, a small part of my expression of self in every single thing I create.

PROJECTS

Angular, Firebase Kanban/Trello

<https://kanban-mihlali.web.app/>

This is an Trello-like drag-and-drop task manager web application with the basic functionality of adding a task to a specific board, removing and updating such task. The app implements user authentication and makes use of angular material and firebase to handle the backend work.

HTML, JS, CSS CollabHous3

<https://collabhous3.co.za/>

CollabHous3 helps build and accelerate small and medium sized businesses. They specialise in innovative business solution design, delivery and ongoing support. This site is built using basic HTML, CSS, JS and some JQuery in certain places. Some cool css features are implemented too.

HTML, JS, CSS Easyburse

<http://easyburse.co.za/>

Easyburse facilitates talent acquisition and management through innovative and fit for purpose digital solutions The goal was to create a corporate feel to the website whilst attempting to maintain a 'student' like essence to the site.
